

# UniFlow Cylinder Heating System Features and Specifications

- Adjustable to fit a range of cylinder diameters and heights
- Integral full height heating element
- Protective, weatherproof and slip resistant outer layer
- Single piece silicone rubber heater element
- Heavy duty Velcro™ fasteners
- Integrated temperature sensors
- Isolated cylinder temperature sensor
- Meets NEC requirements for class 1, div. 2 installations

## Standard sizes

Part:	Diameter	Height	Watts
UF70	6.75" to 7.25"	29" to 35"	600
UF93	9" to 9.5"	45" to 51"	1200
UF97	9.5" to 10"	51" to 57"	1200

(other sizes available on request)

## Controllers

NEALC1x  
NEALC2x

## System Performance

Temperature range: Up to 52°C (125°F)  
Temperature control: ±1°C (±1.8°F)  
Temperature Sensors: Type K thermocouple

## Approvals

CE  
Underwriter recognized component
